

Osoru Tarimoboere Gordin

Data Analyst | Power BI & SQL Specialist

Port Harcourt, Rivers State, Nigeria | tarigordin2@gmail.com

PROFESSIONAL SUMMARY

Quality-driven Data Analyst with a foundation in Civil Engineering, specializing in transforming complex, messy datasets into clear, executive-ready business intelligence. Proven ability to build highly structured relational data models, engineer dynamic DAX measures, and design intuitive, custom-themed dashboards. Leverages a rigorous, mathematical approach developed through field engineering to enforce strict data governance and deliver strategic insights across logistics, HR, and sales operations.

TECHNICAL SKILLS

Data Visualization & BI	Power BI, Microsoft Excel, Custom UI/UX Canvas Design (PowerPoint)
Analysis & Querying	SQL (SQL Server Management Studio)
Modeling & Transformation	Power Query, Advanced DAX, Relational Database Modeling, Date Table Optimization
Programming & Version Control	Python (Foundational), Git, GitHub, Jupyter Notebooks
Soft Skills	Cross-Functional Team Leadership, Stakeholder Communication, Complex Problem Resolution, Adaptability Under Resource Constraints

EXPERIENCE & PROJECTS

Deputy Team Lead (Pod C, Team BrainBox) | Afriment Data Analytics Internship

September 2026 – Present

- Co-lead insights, recommendations, and executive reporting deliverables for a cross-functional data analytics team.
- Manage multi-workstream reporting, including daily team attendance tracking, performance feedback memos, and social media execution metrics.
- Architect multi-page presentation slide decks and BI dashboards covering competitor benchmarks, platform teardowns, and regional skills market gap analysis.
- Enforce analytical accountability by standardizing metric calculations and validating data methodologies across the team.

Data Analyst (Capstone Project) | TS Academy

August 2026 – October 2026

- Engineered an end-to-end, 4-page Logistics Performance Dashboard tracking financial overviews, vehicle utilization, route analytics, and delivery SLAs.
- Cleaned and transformed raw logistics data using Power Query, managing missing values and enforcing standardized date formats for accurate time-intelligence reporting.
- Authored complex DAX measures to calculate YTD revenue, SLA compliance percentages, and average delivery times.
- Designed and deployed a custom dark-navy visual interface to enhance user experience and readability for executive stakeholders.
- Developed an additional comprehensive HR analytics dashboard monitoring workforce demographics, compensation, and retention indicators.

Data Analytics Intern | Codveda Technologies

August 2026 – September 2026

- Built and validated predictive churn models and customer segmentation routines to identify at-risk accounts.
- Executed Level 1, Level 2, and Level 3 predictive modeling deliverables, documenting methodologies and code streams via GitHub.
- Translated machine learning outputs into accessible, interactive Power BI dashboards for non-technical stakeholders.

Freelance Data Analytics Tutor

August 2026

- Structured and delivered a comprehensive 12-session, 6-week technical curriculum focused on Power BI, Power Query, and SQL.
- Guided a student through an end-to-end portfolio project using the Olist E-commerce dataset, covering data ingestion to final dashboard visualization.

Field Engineering Supervisor | Federal Road Maintenance Agency (FERMA)

Prior Experience

- Applied rigorous quality assurance protocols and structural auditing methodologies to infrastructure projects.
- Tracked operational progress, managed site logistics, and documented daily performance metrics to ensure project compliance.

EDUCATION & CERTIFICATIONS

- TS Academy:** Data Analytics Training (SQL, Power BI, Excel, Python)
- National Youth Service Corps (NYSC):** Certificate of National Service (2024)
- B.Sc. Civil Engineering**
